**LEGACY TO
LANDSCAPE**

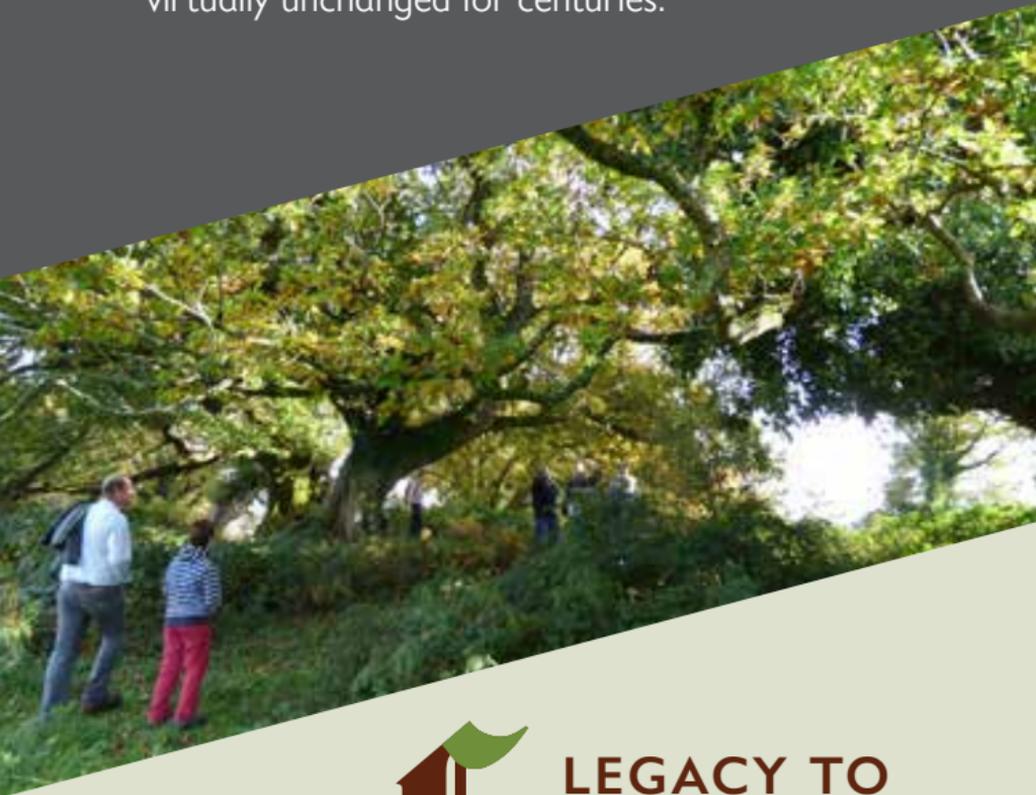

Linking King John's Oak
to the future

Legacy to Landscape: a landscape for all to enjoy

Legacy to Landscape is a three-year project involving the community and celebrates a hidden area of landscape in an area of East Devon, based on a 1780s map of the Shute Estate.

This historic map covers the landscape of the Colyton and Shute area. See pages 6 and 7 for map of project area.

Our second year of wildlife and history activities will reveal the rich heritage of this hidden landscape, which has remained virtually unchanged for centuries.

**LEGACY TO
LANDSCAPE**

Linking King John's Oak
to the future

- **Discover wildlife on your doorstep**
- **Unravel the mysteries of the past**
- **Help improve your local environment**

Ancient Tree Hunt 2017

Help us find those old, gnarled and large trunked ancient trees forgotten and hidden in the legacy landscape, across the district.

Ancient trees aren't mapped across the landscape in the same way ancient woodland is, which makes them unintentionally vulnerable to neglect and lack of management. We need to find where they are to ensure their protection and encourage their seedlings to provide future woodland in this special landscape.

Find out more on how to survey ancient trees on an 'Ancient Tree Hunt in Woodend Park', on Sunday 26 February. **Details on page 7.**

ABOUT OUR EVENTS

All ages welcome unless otherwise stated. Outdoor walks will not take place if heavy rain forecasted. If in doubt, please contact us, details can be found on the back page of this guide.

Wonderful wildlife

Recent wildlife surveys in the Umborne Valley reveal rare meadows rich in wildflowers. However most of the wildlife in the project area is under recorded. The project is discovering how much wildlife still thrives and identifying opportunities to improve it. Wildlife events have been organised to involve local communities in learning how to identify wildlife on their doorstep. This will help in increasing records for the whole project area.

Practical conservation

Practical conservation sessions help improve the landscape and its wildlife. Stay for a few hours or the whole day and play a part in securing the area's wildlife for future generations to enjoy. Tools, gloves and drinks provided.

Unearthing the hidden history of the local landscape

The project area contains a medieval deer park, ancient trees, and was once covered in orchards. However little information is available about its history. We are sure it has many fascinating secrets. If you would like to get involved, then please join us and help investigate old maps and other historical documents and books. We will also be gathering oral histories. If you have a memory to share about the landscape we would love to hear from you. Help us piece together this remarkable historic jigsaw.
